- XI. Scholarship Committee (Blasch) (Chairperson – ***Susan Langendonk***)

**O&M DIVISION BUSINESS MEETING
 CONSENT AGENDA
 July 27, 2018**

I. **TREASURER'S REPORT –**

The meeting registration and travel expenses were for the EAC members to attend the TRB meetings in Washington D.C. in January 2018. It should be noted that the travel expenses were paid from the Polara Engineering donation (\$2000) and sale of the O&M cling/decals (\$357) at the O&M International Conference in July 2017. The EAC members' travel is much more than that but they only submit for the amount that has been donated.

- a. **Ad Hoc Committee of Strategic Planning, Goals, and Initiatives** – Chair – Justin Kaiser, Members include: Susan Langedonk, Chris Tabb, Brenda Naimy, Jennifer Edgar, Christine Telford

STRATEGIC PLAN ANNUAL PROGRESS
August 2017 - June 2018

Executive Summary

Our strategic planning group has met 3 times over the past year to discuss what progress has been made and where we needed to focus future efforts. Recruitment efforts have focused on personal communication with members to encourage more active participation in the division. We will continue our recruitment efforts at the AER conference where there will be an O&M Division table coordinated by the division leaders. We have begun social media accounts and now currently have 482 followers on Facebook and 194 followers on Twitter.

The Environmental Access Committee was able to once again attend the Annual Transportation Research board meetings with a donation from Polara and some additional funds that were raised at the 2017 O&M Conference.

Our effort to research and identify the O&M provider requirements in each state continues. Online searches have identified state requirements for providers children in 35 states and for adults in 11 states. We are working to finish this effort and share the information through the O&M Division website and resources.

The O&M Scope of Practice document is nearly complete. This will be shared with the division membership for a vote and approval. The document has been reviewed and feedback has been provided by past-chairs of the division, the O&M division executive committee, the O&M division membership, and many others.

The O&M division did help to coordinate a 3D pen webinar by Nick Leon in August 2017. There have been recent discussions regarding other possible topics and trying to offer these more often with more informal meetings.

The O&M division has endorsed a letter to ACVREP advocating for COMS to become an accredited certification. In the first year of this strategic plan, many tasks produced results and many we will need to continue to pursue. This plan provides guidance towards long terms with the focus for short term success.

Environmental Access Committee Report by Janet Barlow and JoAnne Chalom

- The EAC has been busy with a myriad of activities ranging from advocating for accessible sidewalks, intersections and construction zones, answering member questions about stair markings and signage, and working with O&M division members on requests and the correct installation of APS and detectable warnings.

Some of the successes include

- Freda Tepfer's repeated emails, phone calls and public comments at city council meetings and the Disability Roundtable resulted in a handout on proper barricades in construction zones.
- Melanie Hughes worked with the Alexandra city traffic engineer to have a guide strip installed at an intersection where a student was having difficulty veering. The outcome of the installation will be evaluated by Melanie and the traffic engineer
- Laura Park-Leach, MAB, worked to have Blindsquare installed on all four floors of the museum in Charlotte, NC and is working with the city on a more extensive installation in the downtown area
- Members provided assistance with accessibility requirements for work zones/construction zones. Note that yellow tape and sawhorses are not acceptable as pedestrian barricades under Manual on Uniform Traffic Control Devices (MUTCD)
- EAC members provided resources to obtain the audible devices for notification in construction zones.
- EAC members, Janet Barlow and Lukas Franck, (who are also members of the Institute of Transportation Engineers, ITE) responded to an article in the May ITE Journal on the implementation of signal timing such as leading pedestrian intervals and exclusive pedestrian phases, noting that APS were needed where these alternative signal timing strategies were installed.
- EAC members are panelists on two National Cooperative Highway Research Projects
We hope you read our lengthy report of activities at the Transportation Research Board Annual meeting this year and found some interesting information there. We urge you to get involved in your local communities. There are a lot of new intersection designs being developed and proposed to give better access or safety for motorists or bicyclists. Some of those may negatively impact the travel of individuals who are blind or who have low vision without careful consideration during the design phase. Most intersection projects have a public meeting requirement and bringing up accessibility concerns early in the project can make a big difference in the final result.
The EAC is ready to help you and answer your questions. You can email us at OandMEAC@gmail.com Please let us know what you would like us to do and how we can be more helpful to those of you in the field.

III. DISTRICT REPORTS
